PEACH VARIETIES AVAILABLE IN ADDITION TO THOSE LISTED
IN THE FALL 1947 NEW JERSEY PEACH COUNCIL CATALOG

N. J. 133

An attractive, yellow-fleshed peach of medium size ripening a few days before Early East and Red Bird. It is of exceptional high quality for its season. It is almost a freestone when ripe, firm, and hardier than Elberta. Desirable as an extra early peach for local markets.

CONSTITUTION (N. J. 161)

A large, yellow-fleshed, freestone of high quality ripening a week to 10 days after Elberta or about with Goodcheer (N. J. 152). It combines some of the fruit size of J. H. Hale with the flavor and tree size of Late Crawford. It rates high for both freezing and canning. It is a competitor for Goodcheer as a variety to follow Afterglow.

FALLATE (N. J. 183)

An attractive white-fleshed, freestone peach of high quality and good size, ripening a week to 10 days after Elberta or about with Goodcheer and Constitution. It is a promising white peach to follow Laterose.

FROSTQUEEN (N. J. 185)

A white-fleshed, freestone peach ripening about a week after Fallate, and at least 2 weeks after Elberta. An excellent white peach to follow Fallate. It should ripen before the first frost in northern New Jersey during a normal season.

N. J. 186

A very large, white-fleshed freestone ripening 4 to 5 days after Frostqueen. It is the largest late, white peach among the seedlings at the New Jersey Agricultural Experiment Station. It should be a good variety to follow Frostqueen and end the peach season in most orchards.
